

Prompt Examples

1. Lead Qualification Prompt + Summaries + Scoring

Used in: HTTP Request node (Groq API call)

System prompt:

You are a lead qualification assistant for NorthPeak Heating & Cooling. Your only job is to analyze lead data and return a single valid JSON object. Never write prose, explanations, or markdown. Return only the JSON object, nothing else.

User prompt:

Analyze this lead and return ONLY a JSON object with exactly these fields:\n\n- urgency_score: integer 1–10. Use this rubric: start at 5, then adjust — ASAP urgency (+2), 'just exploring' (-2), phone number provided (+1), clear budget range (+1), read the description field as natural language. If it is vague or generic (e.g. 'need help', 'interested', 'fix my AC') → +0. If it gives specific context (what broke, when, how it's affecting them) → +1. If it contains urgent language (e.g. 'no heat', 'freezing', 'can't work', 'deadline', 'emergency') → +2. Never award +1 and +2 together — pick the higher one only. Cap at 10, floor at 1.\n- lead_quality: exactly one of 'high', 'medium', or 'low'. High = specific need + budget + phone + detailed description. Low = vague need, no phone, no budget.\n- service_type: 3–5 word string describing what they need.\n- recommended_action: one prescriptive sentence telling the sales rep what to do and when (e.g. 'Call within 1 hour — no heat in winter, high close probability' or 'Add to 7-day drip — early stage, not ready to buy yet').\n- score_reason: one sentence explaining the key signals that drove this urgency score.\n- summary: exactly 2 sentences — what this lead needs, and why they are or aren't a strong opportunity.\n\nLead data:\n\nName: {{ \$json.name }}\nEmail: {{ \$json.email }}\nPhone: {{ \$json.phone }}\nService needed: {{ \$json.service }}\nTimeline: {{ \$json.urgency }}\nBudget: {{ \$json.budget }}\nCity: {{ \$json.city }}\nDescription: {{ \$json.description }}

Example output: (after simplifying using Js)

Json

```
[
  {
    "urgency_score": 7,
    "lead_quality": "medium",
    "service_type": "AC Repair Service",
    "recommended_action": "Call within 2 hours — emergency  
timeline, potential for quick close",
    "summary": "Biswadeep needs emergency AC repair service with a  
budget of $500–$2,000, but the lead quality is medium due to the  
vague description. This is a moderately strong opportunity due to  
the provided phone number and clear budget range, but the sales  
rep should prioritize clarifying the specific needs and context."
  }
]
```

2. Auto-Response Email Prompt (AI-generated)

Used in: Gmail node for normal leads (urgency < 7)

System prompt:
You are a customer service rep at NorthPeak Heating & Cooling. Write short to the point emails. Do not write long overly long mails, have some structure.
User prompt:
Write a short 2-paragraph response email to a lead with these details:\n\nName: {{ \$('Simplifying Data').item.json.name }}\nService needed: {{ \$('Simplifying Insites').item.json.service_type }}\nUrgency score: {{ \$('Simplifying Insites').item.json.urgency_score }}/10\nIssue description: {{ \$('Simplifying Data').item.json.description }}\nCity: {{ \$('Simplifying Data').item.json.city }}\n\nParagraph 1: Acknowledge their specific issue warmly\nParagraph 2: Tell them what happens next\nParagraph 3: Invite them to book via Calendly\n https://calendly.com/biswadeepmazumder29/30min \n\nSign off as 'The NorthPeak Team'. Sound human, not like a template.

Example output: (after simplifying using Js)

```
[
  {
    "email_body": "Hi Biswadeep,\n\nThanks for reaching out to us about your AC Repair Service needs in Jorhat. We can imagine how frustrating it must be to need help with your air conditioning, especially with the summer heat. We're here to help you get your AC up and running smoothly again.\n\nWe'll assign a technician to assess your issue and provide a solution. Next, we'll be in touch to discuss the details and schedule a visit at your convenience. To book a time that suits you, please feel free to use this Calendly link: https://calendly.com/biswadeepmazumder29/30min. We're looking forward to helping you resolve your AC issue.\n\nThe NorthPeak Team"
```
